Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/661,182	Applicant(s) TRAN ET AL.	
	Examiner Evelyn Huang	Art Unit 1625	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE ____ MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 19-33 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 19-33 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on ____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. ____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Art Unit: 1625

DETAILED ACTION

1. Claims 19-33 are pending. Claims 1-18 have been canceled according to the preliminary amendment filed on 9-12-2003.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 19-33 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 19, 'eating disorders', 'sexual dysfunction' are unclear since they are general classes of disorders embracing opposing and conflicting conditions. For example, 'eating disorder' would encompass both hyperphagia and anorexia, and 'sexual dysfunction' would embrace the conditions involving both the inhibitory and stimulatory sexual behaviors. What are the intended metes and bounds of these disorders/conditions? The rejection is applicable to claims dependent on claim 19.

Claim Rejections - 35 USC § 112(1)

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 19-33 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. ***.

Art Unit: 1625

a. *Nature of the invention.*

The instant invention is drawn to the method of using a dihydro-[1,4]dioxino[2,3-b]pyridinyl compound in the treatment of obesity, eating disorders, vasomotor flushing, cocaine addition, alcohol addiction or sexual dysfunction.

b. *State of the prior art and the level of the skill in the art.*

5-HT receptors are known to have subclasses differing in their structures, regional distribution, pharmacology, modes of actions, and functions (Wijngaarden, Recl. Trav. Chim. Pays-Bas, 1993, 112:126-130; Barnes et al. Neuropharmacology, 1999, 38: 1083-1092, pages 1085-6). While 5HT_{1A} receptor has been implicated in many physiological responses, and 5HT_{1A} receptor agonist has been shown to have anxiological and antidepressant activity, the nexus between obesity, eating disorders, vasomotor flushing, cocaine addition, alcohol addiction or sexual dysfunction and 5HT_{1A} receptor has not been fully established. For example, while 5HT_{1A} receptor agonist evokes hypothermia, inhibition of 5HT synthesis and 5-HT lesions do not prevent hypothermia when the agonists are injected in rats (Barnes, page 1092). Some of the responses elicited by a 5HT_{1A} receptor agonist, 8-OH-PAT, such as hyperphagia (Fletcher et al. Psychopharmacology, 1990, 100(2): 188-94, abstract), altered sexual behavior (Matuszewich et al. Brain Research 1999, 820(1-2): 55-62, abstract), are not reversed by a 5HT_{1A} receptor antagonist, thereby suggesting that these effects are not mediated by the 5HT_{1A} receptor.

The level of the skill in the 5-HT_{1A} receptor ligand art is high.

c. *Predictability/unpredictability of the art.*

The high degree of unpredictability is well recognized in the 5-HT receptor ligand art. A slight change in the structure of the compound would drastically alter its affinity and selectivity (Wijngaarden, Recl. Trav. Chim. Pays-Bas, 1993, 112:126-130, pages 129-130, Fig. 6, Fig. 7, Fig. 8).

d. *Amount of guidance/working examples.*

Preparation of example compounds has been described.

The procedures for the 5-HT transporter binding assays, 5-HT_{1A} receptor binding assays, and the assay for the assessment of the antagonist activity, are found on pages 31-32 of the specification. Results are shown for Examples 1-4.

No in vivo procedures are described.

e. *The breadth of the claims.*

Applicant's assertion that all the inventive compounds would be effective in treating obesity, eating disorders (including the conflicting hyperphagia and anorexia), vasomotor flushing, cocaine addiction, alcohol addiction or sexual dysfunction (including the conditions involving the opposing inhibitory and stimulatory sexual behaviors) does not commensurate with the scope of the objective enablement, especially in view of the high degree of unpredictability in the art, the limited working examples and the non-establishment of the nexus between the antagonism of 5HT_{1A} receptor and these recited conditions (paragraphs b, c, d above).

f. *Quantitation of undue experimentation.*

Since the instant 'eating disorders', 'sexual dysfunction' etc. are general classes of disorders embracing opposing and conflicting conditions, it is impossible to use a single 5HT_{1A} receptor antagonist compound of the instant to treat all these contradictory conditions (see paragraph 2 above). Furthermore, in view of the high degree of unpredictability in the art, the limited working examples and the fact that the breadth of the claims does not commensurate with that of the objective enablement, the disclosure as presented would not allow one of ordinary skill in the art to use the invention as claimed without undue experimentation (paragraphs b-e above).

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 1625

Claims 19-33 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 14-17 of U.S. Patent No. 6656950. Although the conflicting claims are not identical, they are not patentably distinct from each other. The instant method was part of the original claims in the parent application that matured into 6656950, and it is not a result of a restriction requirement of the parent application.

Conclusion

5. No claims are allowed.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Evelyn Huang whose telephone number is 571-272-0686. The examiner can normally be reached on Tuesday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph McKane can be reached on 571-272-0699. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
